Last mile connectivity to
DLF Cybercity with

www.dlfcybercity.com

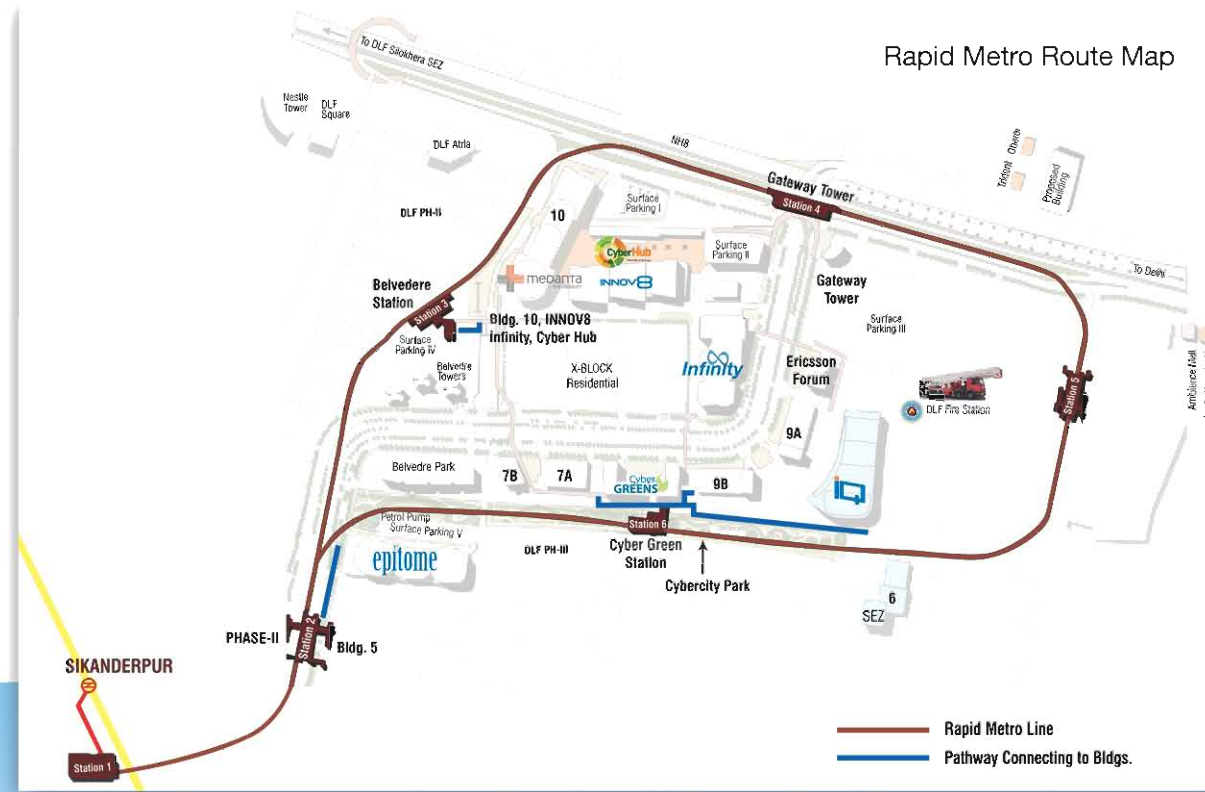

DLF Cybercity is now ready for the arrival of

DLF Cybercity is once again about to be in the news for all good reasons. This is a young and vibrant business district with its millennium-city buildings, world class office infrastructure and upwardly mobile people who come to work here from different parts of India and globally.

Conceived as a necessary function of modern infrastructure, the Rapid Metro (as it is called), is symbolic of Gurgaon's overall vision, to be a destination of choice for multinationals as well as the travelled Indians. Rapid Metro is starting its journey in what is Gurgaon's most important and populated business arena – DLF Cybercity.

Experience Independence

Hassle-free Eco-friendly Transport at Lower Cost

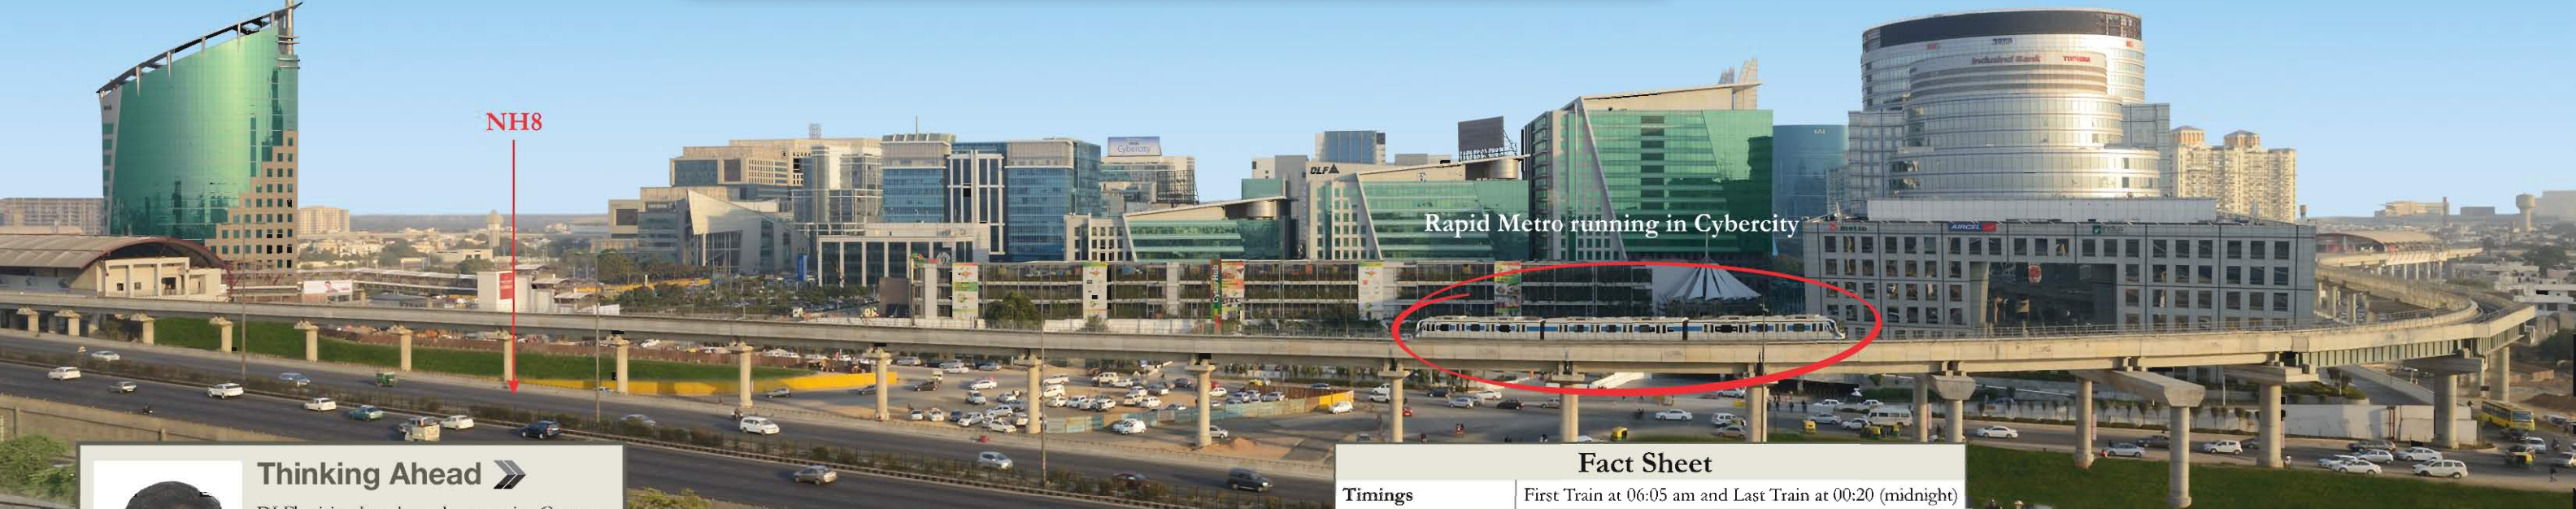

Consider this –

- If you are using your own car to travel from home to work, the Rapid Metro can save you up to 90% of your travel cost every month and reduce the fatigue level of driving one's own car to office, thus improving work-life balance, ensuring road safety also contribution to environment by using clean fuel.
- If you are an organization providing transport for your employees, the savings can be up to 75% per person or up to Rs 20-30 per sq ft per month on your occupancy cost.

If money saved is money earned, then DLF Cybercity can hope for huge savings every month for all its inhabitants who can travel long distances hassle free with the help of this last mile connectivity.

Rapid Metro running in Cybercity

Thinking Ahead

DLF's vision has always been to give Gurgaon something ahead of its time, something that is eco-friendly, that is sustainable, that saves time, energy and money. The Rapid Metro—an offering by IL&FS is a symbol of this kind of vision, which shows youthfulness, resourcefulness and a great attention to the future. Rapid Metro with stations encircling the Cybercity Business District would offer closest drop off points for easy access to office buildings. It would help companies operating at Cybercity save on their transportation cost and thus reduce the overall occupancy cost.

It fits into our vision at DLF building India with a sustainability vision. We welcome the Rapid Metro with open arms and are confident that it will be a huge bonus for business and leisure in DLF Cybercity, not just now, but in times to come.

Ramesh Sanka
MD, DLF (Rentco)

DLF Cybercity is a complete integrated and self-sustained business district, which is home to world class office buildings, support infrastructure and MNCs. And now the Rapid Metro brings with it good cheer and much convenience for its citizens with the ultra modern Rapid Metro rail network, which encircles the entire Cybercity area. Using Rapid Metro, people working in Cybercity can seamlessly connect to their offices from the Delhi Metro, which means that thousands of daily commuters can simply travel from the existing Sikanderpur station to Cybercity buildings through the Metro network.

Also on the cards, is a sixteen lane toll free expressway running through this magnificent arena and enhanced work life infrastructure like Cyber Hub, Skywalks, Cyber Park – designed by international architect Mr. Paul Friedberg along with Hafeez Contractor.

Aesthetics has been considered as critical as functionality by the designers of the Metro, giving it a swanky international feel. The Rapid Metro uses no overhead cables and the six stations are all stunning in their colours and design.
